# Auto Car Locksmith Near South London

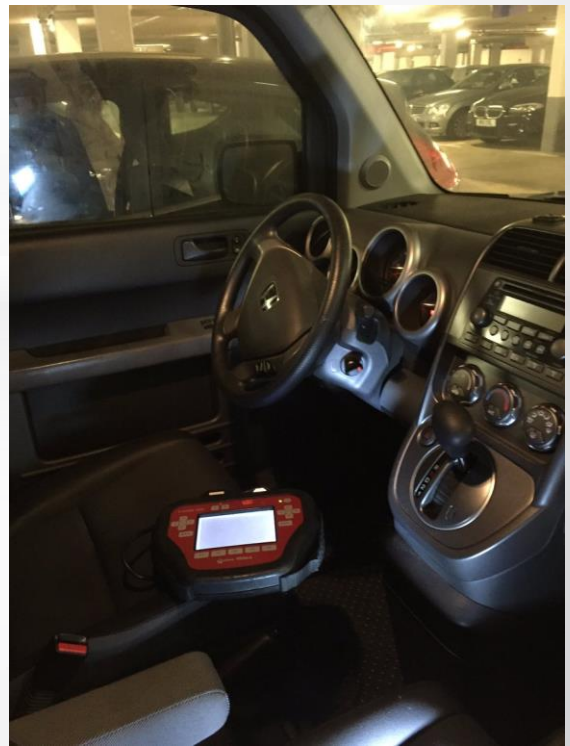

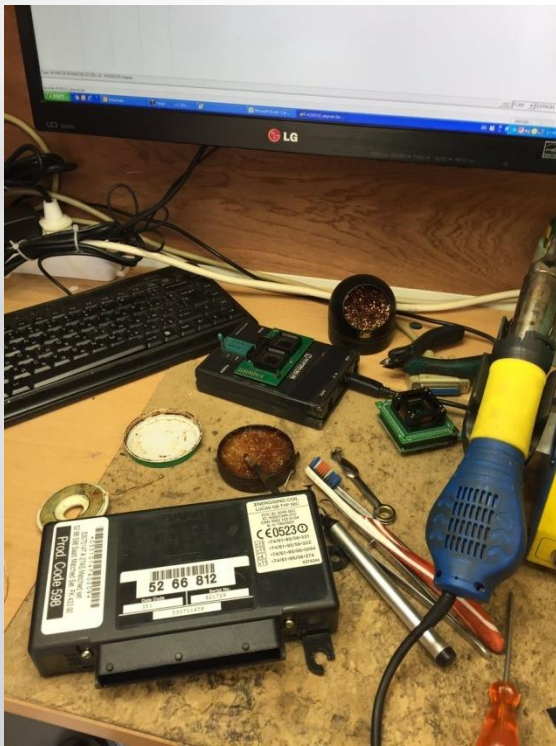

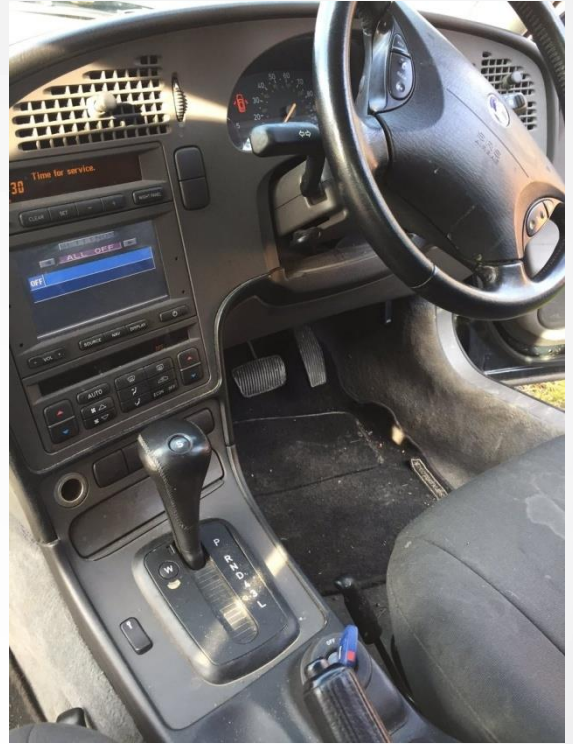

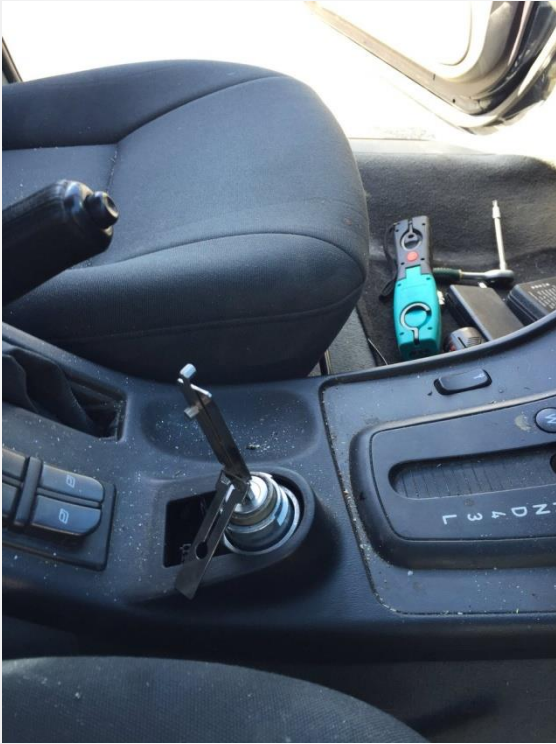

We aim to attend all call outs within one hour in the South London area (unless you request an appointment for a later specific time that's more convenient for you.)

Our vans are equipped with the latest diagnostic tools and software, enabling us to identify and cut new keys without an original, to program immobilizer transponder chips and key fobs, and even to recode vehicle ECUs so that previous keys will no longer function. This is vastly better than contacting your main dealer and much more affordable too. Before they'll replace a lost car key for you, a main dealer will expect you to present your V5 document to them at the dealership.

You have metallic as well as well as electronic car key which not only wears down in usual ways, but you have other risk to lose your keys. The main reason could be damaging your car keys, breaking it somehow and then calling an auto locksmith for creating another key. Breaking your car keys could seem rare to you but it has more possibility than you think.

# Broken Car Keys

You put your keys in the ignition and somehow it gets stuck and breaks down while turning it on or it could just break off when another vehicle runs over it while you were trying to put it in your pocket.
