amk Architekten

Client: Melanie Karbasch

amk Architekten

Web DesignUI | Visual Design | Logo Design | Front-end/Back-end

<https://amk-architekten.com>

I was responsible for the full project: identifying client needs, design, implementing the front-end code, prepare the backend and install the SSL secure site.

Description:

Melanie Karbasch is a modern, urban architect. The main goal was to create a fresh and creative design that presents her vita and projects in the most engaging way. Starting with the logo design, the site was completely tailored to Melanie and her projects.

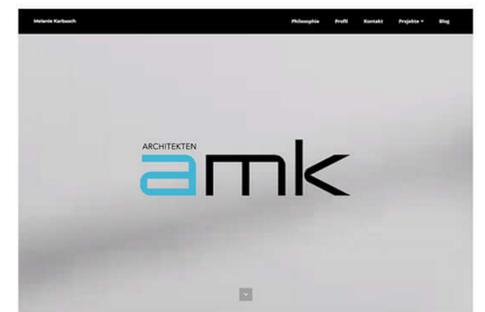

The full responsive implementation was done with Bootstrap, Html and CSS. The site was realized from design to programming.

Roles & Methods:

UI/UX, User Interviews, Wireframing, Web Design, Front-End & Back-end Development.

Year : 2016

Tags: UI design, wireframing, responsive web design, bootstrap, CSS, hosting

PHILOSOPHIE

Integration, Individualität und Bewusstsein
Jedes einzelne Projekt beginnt mit der Erkennung der Wünsche und Bedürfnisse der Auftraggeber. Einmalig ist die Gestaltung der einzelnen Aufträge: die unterschiedlichen Aufgaben und der jeweiligen Zielsetzung sind immer wieder neu zu definieren. Einmalig ist die Umsetzung der Aufträge: die unterschiedlichen Aufgaben und Bedürfnisse der Auftraggeber sind immer wieder neu zu definieren. Einmalig ist die Umsetzung der Aufträge: die unterschiedlichen Aufgaben und Bedürfnisse der Auftraggeber sind immer wieder neu zu definieren.

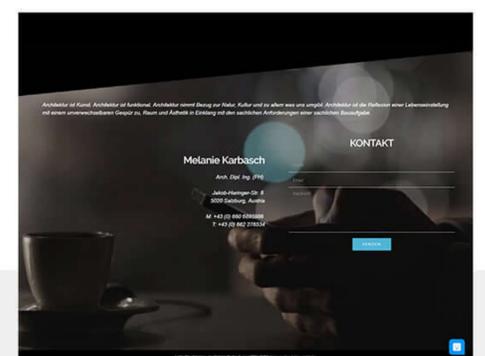

Werte, Verantwortung und Können
Die Verantwortung der Architekten ist die Verantwortung der Auftraggeber. Die Verantwortung der Architekten ist die Verantwortung der Auftraggeber. Die Verantwortung der Architekten ist die Verantwortung der Auftraggeber.

PROFIL

WidgetsForMuse

Client: widgetsformuse

Widgets for Muse

Web DesignUI | Visual Design | Logo Design | Front-end/Back-end

<https://widgetsformuse.com>

I was responsible for the full project: design, implementing the front-end code, prepare the backend and install the SSL secure site.

Description:

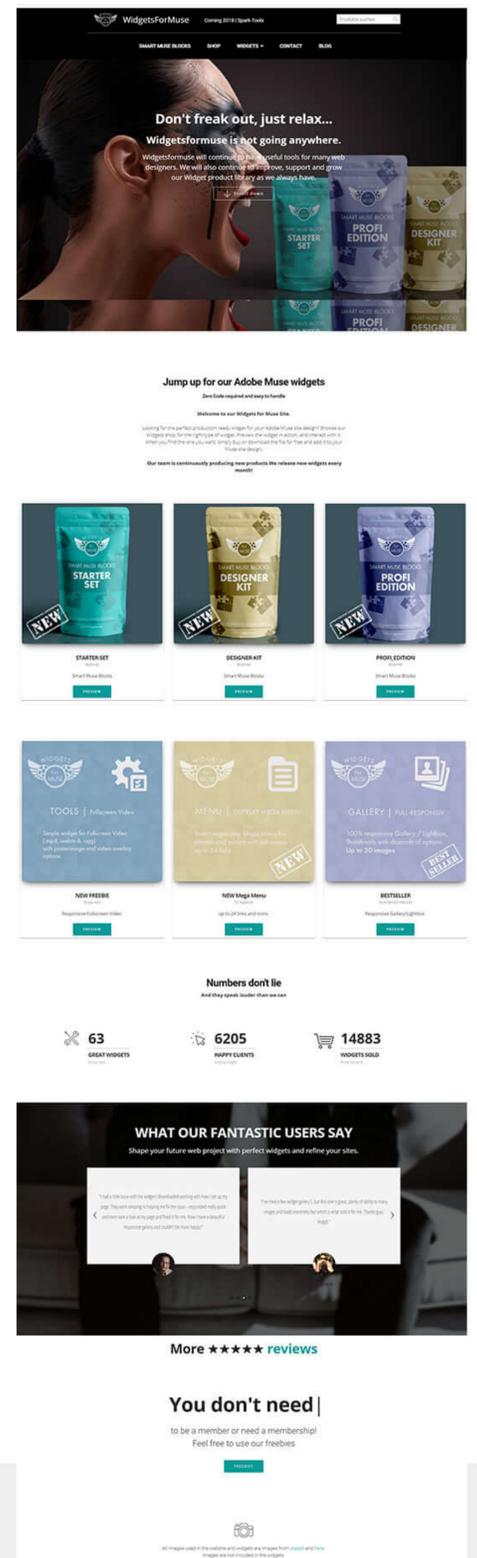

This platform is primarily an online shop for Adobe Muse widgets. All widgets were designed, programmed and marketed especially for Muse users by myself. Modern design and best usability shop with simple product integration that works on all devices were a basic requirement. Tools for this: Photoshop, Bootstrap, Html and CSS. The site was realized from design to programming.

Roles & Methods:

UI/UX, Widgets programming, Shop, Web Design, Front-End & Back-end Development.

Year : 2015

Tags: UI design, responsive web design, Shop, bootstrap, CSS, hosting

Power Haus "The Gym"

Client: Michael "Ben" Nolte

Power Haus "The Gym"

Web DesignUI | Visual Design | Front-end/Back-end

<https://powerhaus.at>

I was responsible for the full project: identifying client needs, design, implementing the front-end code, prepare the backend and install the SSL secure site.

Description:

Power Haus is the largest studio in Salzburg, specialized in Bodybuilding, Powerlifting, and MMA. The primary aim was to create a design that is totally different from fitness and wellness studios. The site should be modern, fully responsive, easy to update, include a search/filter option and a dedicated members area (like a "small" Facebook).

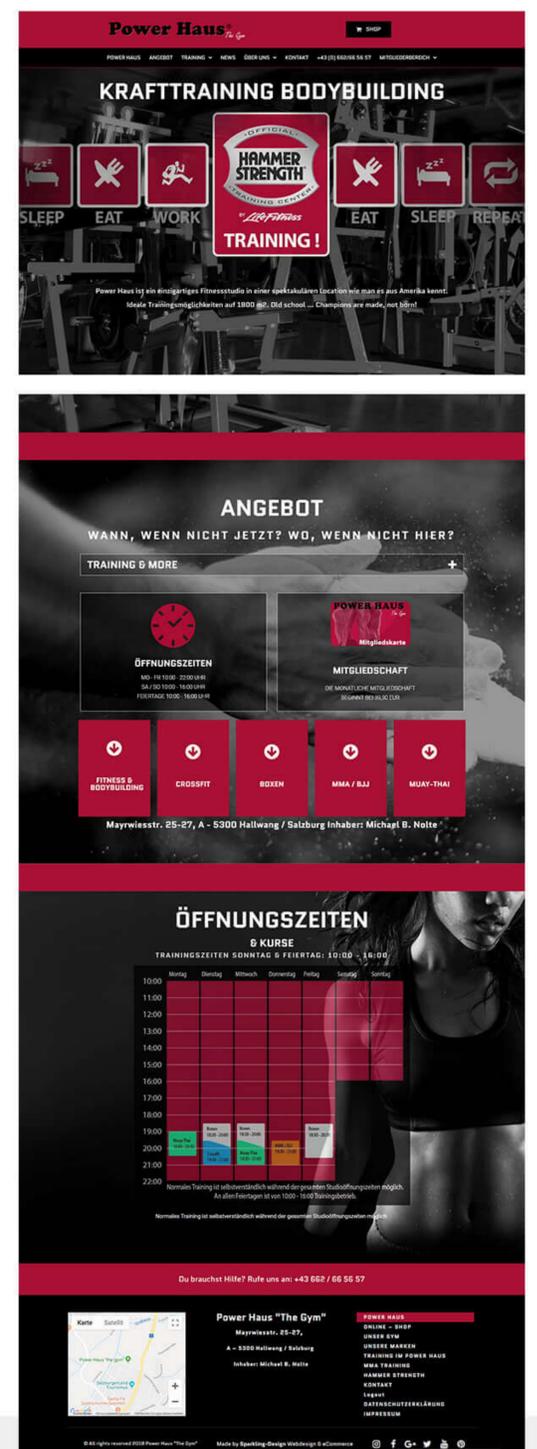

The implementation was realized completely with WordPress, PHP and CSS. The site was realized from design to programming.

Roles & Methods:

UI/UX, User Interviews, Wireframing, Web Design, Front-End & Back-end Development.

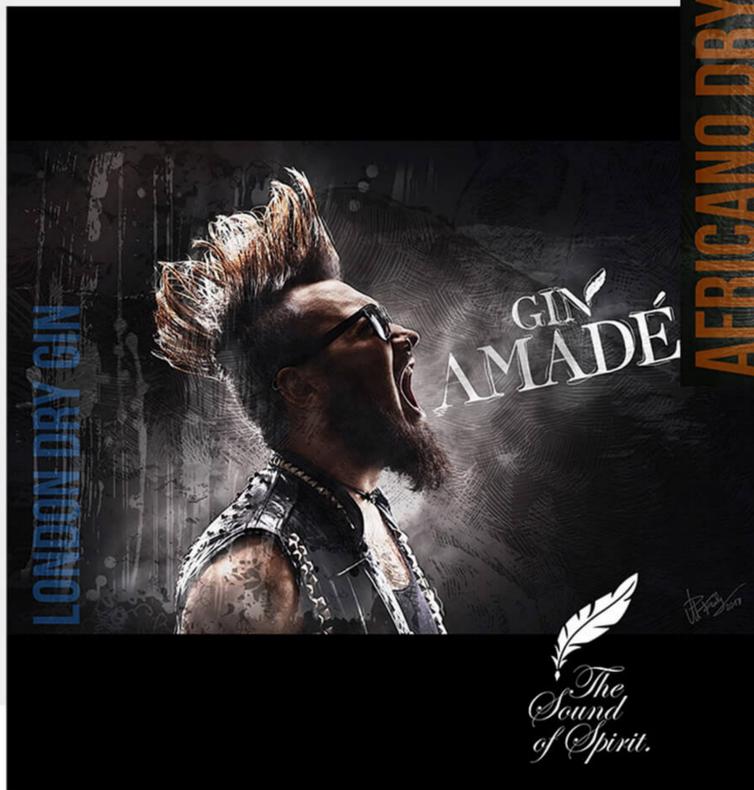

Year : 2016

Tags: UI design, wireframing, memberlogin, community, search function, responsive web design, WordPress CSS, hosting

GIN AMADÉ

Client: Martin Ragginger - The sound of spirit

Gin Amadé

Art Design | Print Design

I was responsible for the full project: identifying client needs, Selection of pictures, Art design & print design, picture editing and painting

Description:

Poster and print advertising for "Gin Amadé", a product of "The Sound of Spirit". The purpose was to create a folder and posters for the largest catering trade fair in Austria. The design should attract attention and make the consumer inform themselves about the products.

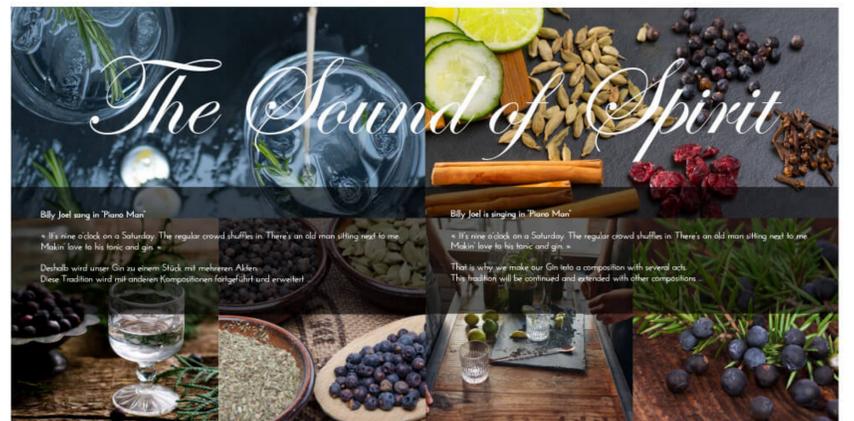

As source, a selection of images was taken, which were then edited and revised in Photoshop. The text and the layout have been designed to match the product, the presentation, and the images.

Roles & Methods:

Art Design, Print design

Year : 2016

Tags: Art design, print design, Photoshop, painting

Hauser & Hauser Rechtsanwälte

Client: Dr. Ulrike Hauser & Dr. Peter Hauser

Hauser & Hauser

Web DesignUI | Visual Design | Front-end

<https://hauserhauser.at>

I was responsible for the full project: identifying client needs, design and implementing the front-end code.

Description:

Is a modern Salzburg-based law firm that works in certain fields since 1985. The idea was to create a website with an almost serious but modern and fresh impact. The areas of legal advice should be visualized in a simple and understandable way.

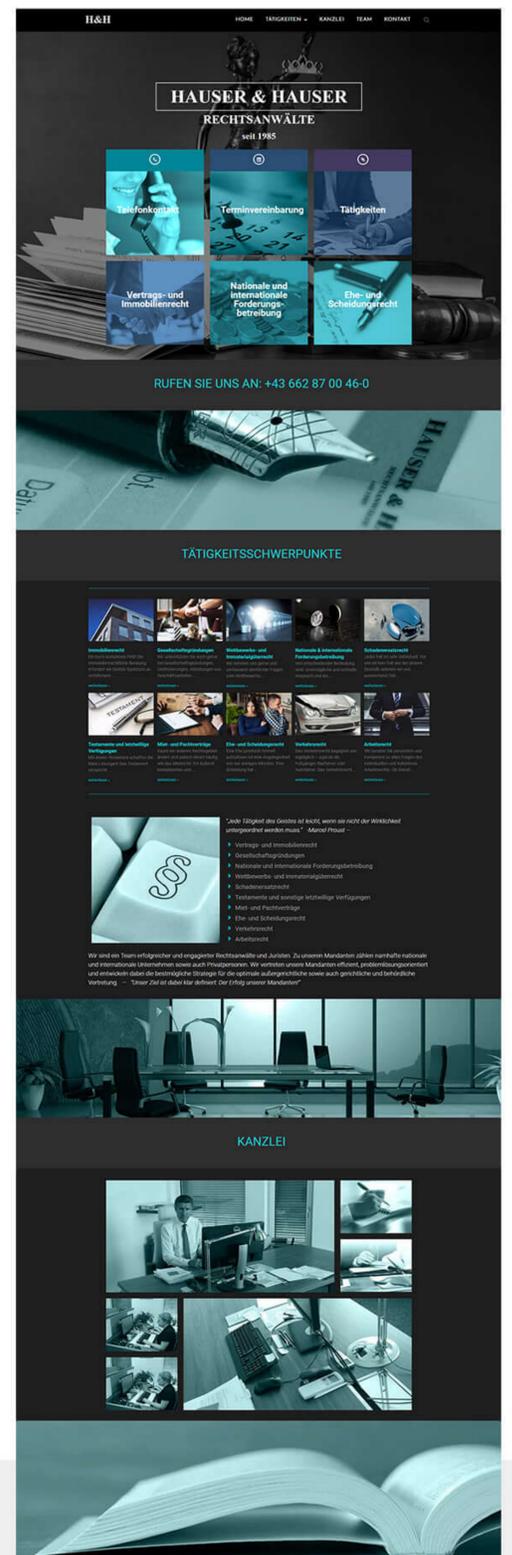

The implementation was done with WordPress to allow easy updates. The site was realized from design to programming.

Roles & Methods:

UI/UX, User Interviews, Wireframing, Web Design, Front-End Development.

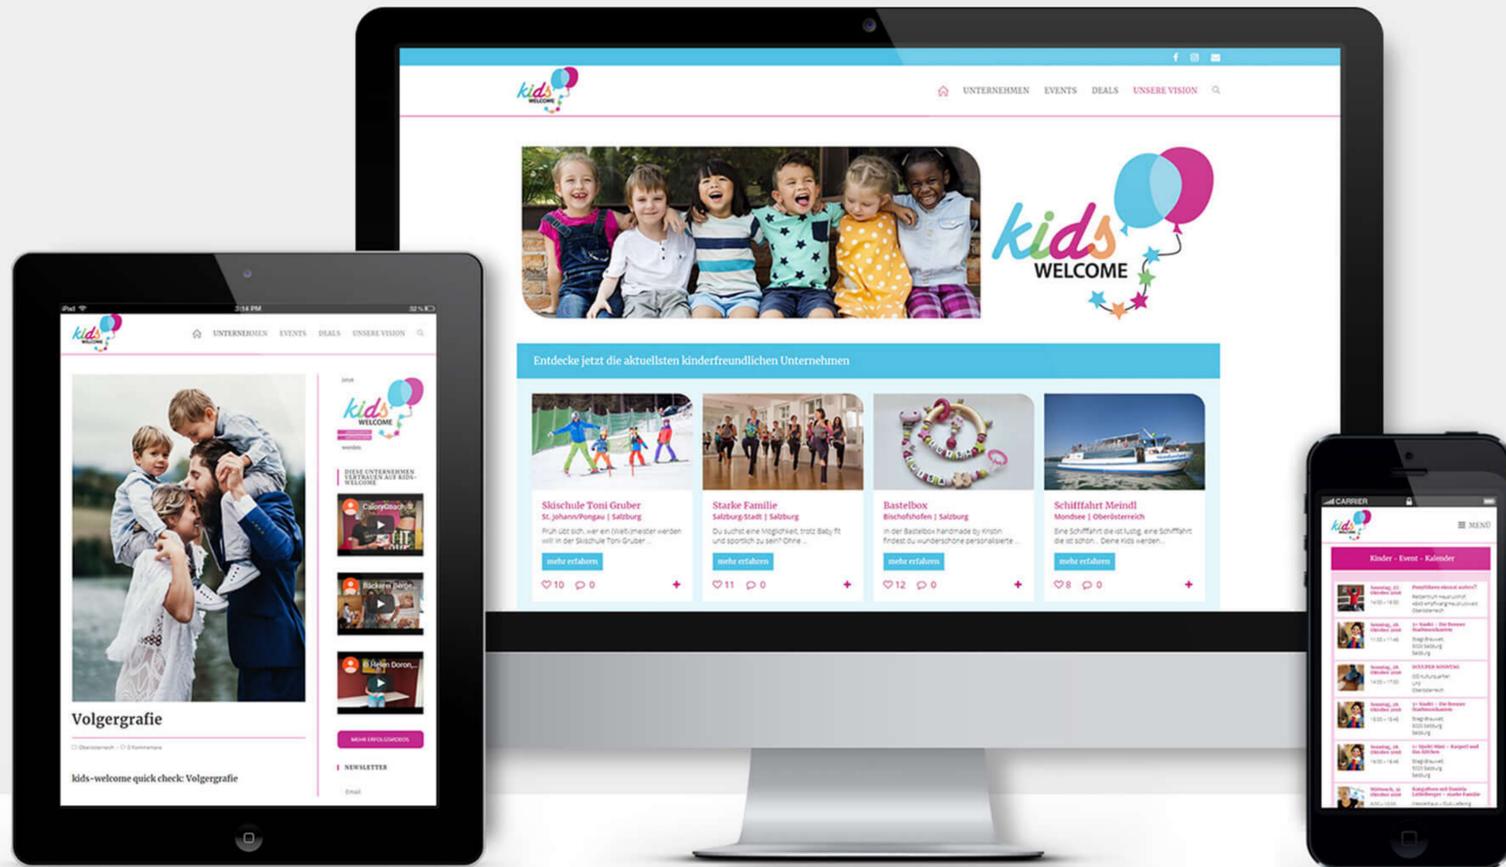

Year : Redesign will be online Dec 2018.

Tags: UI design, wireframing, responsive web design, WordPress CSS

kids-welcome

Client: Simone Wolf & Bettina Frigger

kids-welcome

Web DesignUI | Visual Design | Front-end/Back-end

<https://kids-welcome.family>

I was responsible for the full project: identifying client needs, design, implementing the front-end code, prepare the backend and install the SSL secure site.

Description:

Is a huge platform for "kids-friendly" companies and businesses of all kinds. The objective was to create a fresh and friendly design that presents the companies in the most sympathetic way. The website should be maintained and extended by the owners in the simplest possible way. Implementation complete with Word Press, Php and CSS. The site was realized from design to programming.

Roles & Methods:

UI/UX, User Interviews, Wireframing, Web Design, Front-End & Back-end Development.

Year : 2018

Tags: UI design, wireframing, responsive web design, Word Press CSS, hosting
