

I study brain

MEDIA KIT

Natália Ribeiro

@ISTUDYBRAIN

profile

Natália Ribeiro is 20 years old, likes to read, to play instruments, to sing and she loves her stationery more than people. She created @istudybrain to motivate herself and others to study, but what she didn't expect was that a lot of people would actually engage with her and her content. Being a Psychology major, people like to talk to her about their personal feelings, specially about college and life decisions.

about us

I study brain is an Instagram page that talks about college life, studying tips and stationery. I try to help everyone the best way I can, specially about the hard decision of choosing a major, due to the fact that it has been a big problem in Brazil.
